<u>Test Code</u>	<u>Test Name</u>	<u>CPT</u>
GLU	Glucose, Random	82947
GLO	Glucose, Fasting	82947
GLPP	Glucose, Post Prandial	82947
GLU4P	Glucose, 4 P.M.	82947

All Glucose testing that is included in a panel such as:

RENAL	Renal Function Panel
GTTDM	Glucose Tolerance, Diabetes Mellitus

Will also **require** that either Medical Necessity criteria is met or an Advanced Beneficiary Notice be signed.

MEDICARE LIMITATIONS AND GUIDELINES:

Depending upon the age of the patient, type of diabetes, degree of control, complications of diabetes, and other co-morbid conditions, more frequent testing than four times annually may be reasonable and necessary. In some patients presenting with nonspecific signs, symptoms, or diseases not normally associated with disturbances in glucose metabolism, a single blood glucose test may be medically necessary. Repeat testing may not be indicated unless abnormal results are found or unless there is a change in clinical condition. If repeat testing performed, a specific diagnosis code (e.g., diabetes) should be reported to support medical necessity. However, repeat testing may be indicated where results are normal in patients with conditions where there is a confirmed continuing risk of glucose metabolism abnormality (e.g., monitoring glucocorticoid therapy).

GLUCOSE

Narrative Description	ICD9
Abnormal glucose tolerance complicating pregnancy, childbirth or the puerperium, unspecified as to episode of care or not applicable	648.80
Abnormal glucose tolerance complicating pregnancy, childbirth or the puerperium, antipartum condition or complication	648.83
Abnormal glucose tolerance complicating pregnancy, childbirth or the puerperium, postpartum condition or complication	648.84
