Changes

Total Testosterone: Reagent Shortage

Due to a reagent shortage, the laboratories are unable to perform Total Testosterone testing in-house. Effective immediately, this test will be sent to Quest until the reagent is available. Please be aware that the specimen requirements will change from an SST Tube to a Red Top Tube during this time.

Specimen Requirement: Red Top Tube

Chlamydia and Gonorrhea Testing Changes

On 11-7-13, the laboratories will change the test names for the molecular Chlamydia and Gonorrhea tests in EPIC. There will be separate tests for male and female.

The new test names are:

Chlamydia Amplified Probe Male - Test Code CTM
Chlamydia Amplified Probe Female - Test Code CTF
Gonorrhea Amplified Probe Male - Test Code GCM
Gonorrhea Amplified Probe Female - Test Code GCF

These tests may also be ordered together.

The new panel names are:

GC and Chlamydia Probe Female - Test Code GCCTF
GC and Chlamydia Probe Male - Test Code GCCTM
